An unrelenting commitment to the challenges of the ever-expanding global market

While our material production bases are concentrated in Japan, the Toyo Tanso group has established subsidiaries in countries and regions in North America, Europe, and elsewhere in Asia that carry out machining, added-value treatments, and sales.

This globe-spanning, direct-sales-oriented network allows us to accurately apprehend the latest needs of customers in every country and region, ensuring that we are able to respond promptly and adequately, and supply high-quality products.

Borderless information sharing

All of the information we have accumulated through our involvement with users across a wide range of industrial fields around the world is used as feedback to create better products in the future. At Toyo Tanso we share the latest information on market- and user-related trends and other topics by encouraging close communication between managers and engineers from around the world.

Globally connected organization and employee development

Our international subsidiaries are organized by region and applications/products, and their leaders have the authority and responsibility to carry out work from strategic planning to execution. We also focus on developing sales engineers and machinists across the group through initiatives such as sending engineers to overseas subsidiaries and providing training for local staff.
