Toyo Tanso Hosts “INGSM-26” - International Conference on Graphite Materials for Nuclear Applications, in collaboration with JAEA

Toyo Tanso Co., Ltd. (Headquarters: Osaka; Chairman, President, and CEO: Naotaka Kondo; hereinafter “Toyo Tanso”) will host “The 26th International Nuclear Graphite Specialists’ Meeting (INGSM-26)”, an international conference on graphite materials in the nuclear application, with the Japan Atomic Energy Agency (Headquarters: Tokai Village, Naka District, Ibaraki Prefecture; President: Masanori Koguchi, hereinafter “JAEA”).

INGSM-26 will serve as an international conference for sharing research findings on the role, latest technologies, and reliability of graphite materials in Graphite-moderated nuclear reactors, such as HTGRs. It brings together researchers, engineers, industry professionals, and regulatory authorities from around the world.

Event Overview

- Dates:** October 2026 *The official schedule is coming soon.
- Venue:** Osaka City (Umeda)
- Content:** Presentations and discussions on the latest trends in fundamental research, manufacturing technologies, applications, and safety/reliability in the nuclear application concerning graphite materials for graphite-moderated nuclear reactors (e.g. HTGR).
- Organizers:** Toyo Tanso, Japan Atomic Energy Agency (JAEA)
- Official Website:** <https://ingsm26.toyotanso.co.jp/>

*Themes, programs, presentation abstract, and participation guidelines are scheduled to be announced on the official website around spring 2026.
