Notice Concerning Price Revision for Carbon Products

TOYO TANSO CO., LTD. (Head Office: Japan; Chairman, President and CEO: Naotaka Kondo; hereinafter referred to as the "Company") hereby announces a revision of the prices of its carbon-related products as outlined below. We sincerely appreciate our customers' understanding and continued support.

1. Reason for the Price Revision

The Company has continuously pursued cost reduction and productivity improvements in order to maintain stable product pricing. However, in recent years, production costs, including raw material costs, energy costs, and logistics expenses, have risen significantly due to changes in the global economic environment. Under these circumstances, it has become extremely difficult to maintain current prices solely through our own efforts.

Accordingly, the Company will revise the prices of its carbon-related products.

2. Applicable Products

All carbon-related products

- Special graphite products
- Carbon products for mechanical applications
- Carbon products for electrical applications
- C/C composite products

3. Effective Date

Applicable to orders received on or after October 1, 2026.

4. Revision Range

Price increase of 10% to 15% from current sales prices

*The revision range may vary depending on the product.
